# Getting Started with the Encore3 Stream Deck Plugin

The Elgato Stream Deck application must already be installed and actively running on your computer.
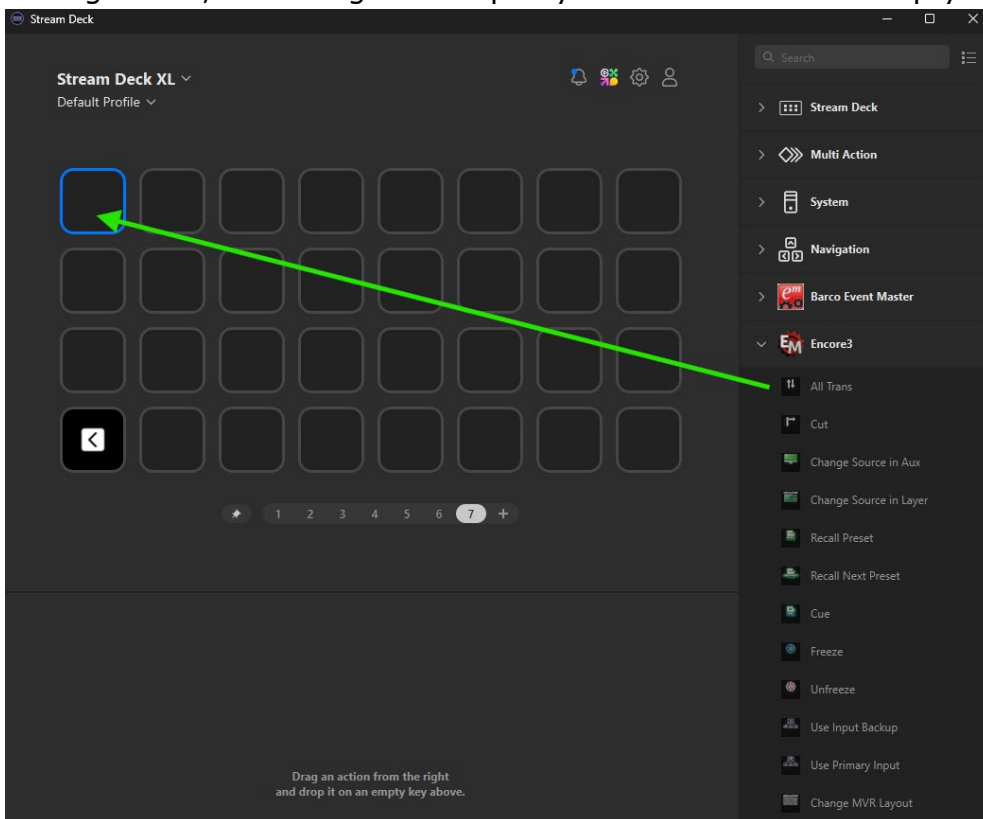

1. Navigate to where the plugin file was downloaded and double-click it to install it into the Stream Deck application.

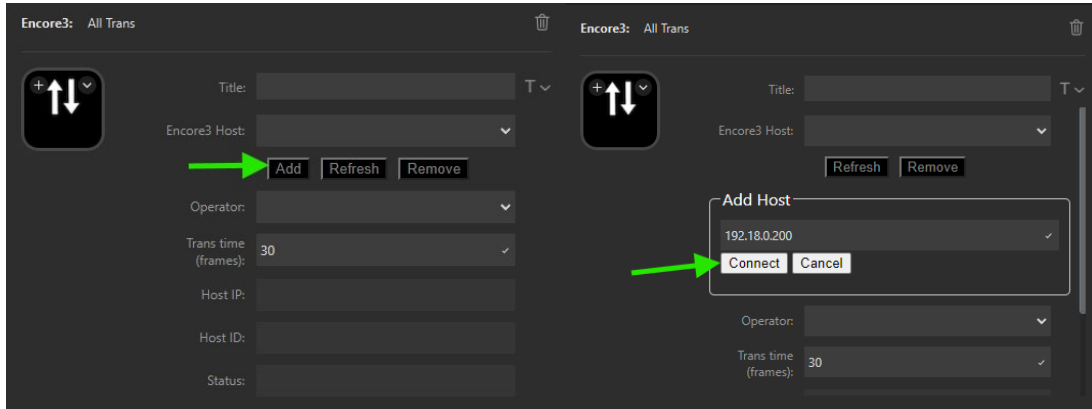

2. A dialog box will pop up on the screen. Click the "Install" button to import the plugin into the Stream Deck application.

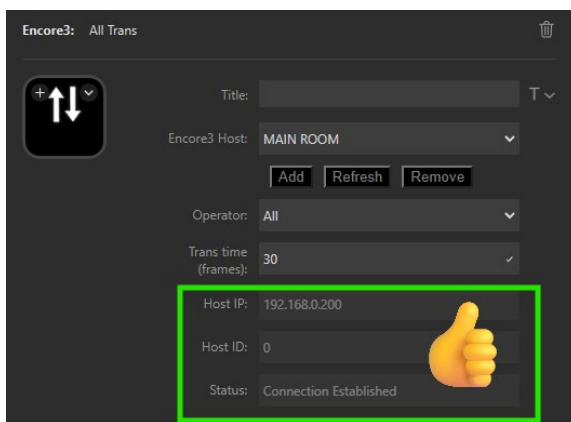

3. Open the Stream Deck window to see the Encore3 plugin was added to the list on the right side, then drag and drop any of its actions to an empty key.
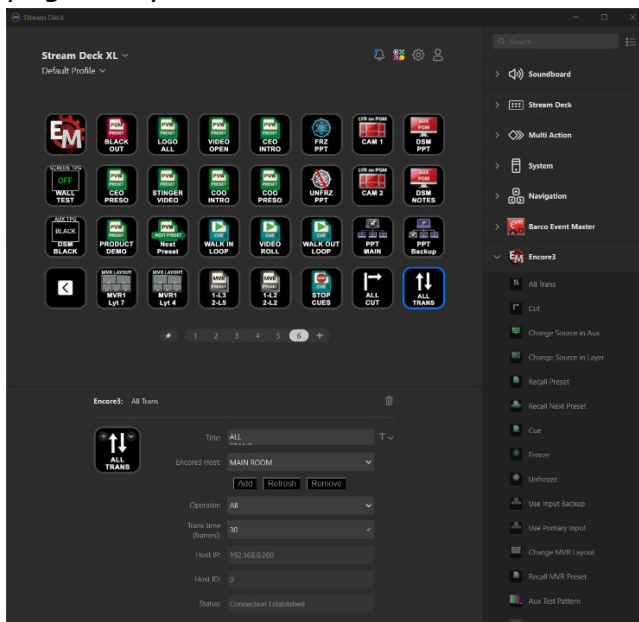

BARCO

4. Beneath the "Encore3 Host" drop-down box, click the add button to enter the IP address of the Encore3 system's host unit and click "Connect."

5. Once connection is established with the Encore3 host unit, its system name will appear in the "Encore3 Host" drop-down menu as well as show its IP address, Unit ID and connection status towards the bottom of the window.

6. Add title to the keys, if necessary, and populate as many of them on as many pages as you need.

7. Send any feedback via email to encore3@barco.com.
